

Listing of the Claims:

Below is a listing of all claims using a strikethrough and underlining to show changes.

1. (Currently Amended) A portable telephone set comprising:

an image input part for ~~inputting receiving an~~ image thereto from a camera or the like,

an image analysis part for recognizing the image and converting the image to code data,

a display part for displaying the code data,

a key input part for additionally inputting, with respect to the ~~an~~ output of the image analysis part, identification codes related to items to be registered or data of each item,

a storing part for storing data for each item, and

a control part for extracting data of each item from the code data based on the identification codes and registering the extracted data.

2. (Original) The portable telephone set according to claim 1, which permits preliminarily registering identification codes, and in which the control part extracts data subsequent to each identification code from the code data and registers the extracted data in the storing part for each item.

3. (Currently Amended) A portable telephone set comprising:

an image input part for ~~inputting receiving an~~ image thereto from a camera or the like,

an image analysis part for recognizing the image and converting the image to code data,

a display part for displaying the code data,

a memory part for storing data of each item,

a key input part for specifying code data displayed on the display part, and

a control part for

displaying an instruction for specifying data to be registered for each item

on the display part,

extracting, in response to cursor specification of data to be registered by the key input part, the specified data part, and
registering the extracted data part as data of each item in the storing part.

4. (Currently Amended) The portable telephone set according to claim 1, wherein image transferred from a different portable telephone set is ~~inputted to received by~~ the image input part.

5. (Previously presented) The portable telephone set according to claim 1, wherein the data form of the image is JPEG

6. (Currently Amended) A portable telephone set comprising:

a receiving input part for ~~inputting to receiving~~ code data transferred from a different portable telephone set ~~or the like~~,
a display part for displaying code data,
a key input part for additionally inputting to the same identification codes related to items to be registered with respect to the code data or data of each item,
a storing part for storing the data of each item, and
a control part for extracting the data of each item from the code data based on each identification code and registering the extracted data in the storing part.

7. (Original) The portable telephone set according to claim 6, which permits preliminarily registering identification codes, and in which the control part extracts data subsequent to registered identification codes from the code data and registers the extracted data for each item in the storing part.

8. (Currently Amended) A portable telephone set comprising:

a receiving input part for ~~inputting to receiving~~ the same code data transferred from a different portable telephone set,
a display part for displaying code data,

a storing part for storing data of each item,
a key input part for specifying code data displayed on the display part, and
a control part for
displaying an instruction for specifying data to be registered for each item
on the display part,
extracting, in response to cursor specification of data to be registered in
the key input part, the specified data part, and
registering the extracted data part as the data of each item in the storing
part.

9. (currently amended) The portable telephone set according to ~~claims~~ claim 6, wherein
the data form of the transferred code data is a text or bar code form.

10. (Previously presented) The portable telephone set according to claim 1, wherein the
control part displays reserved data on the display part, and has a control function of
transferring the displayed data on a different portable telephone set and a control function
of receiving the data transferred from a different portable telephone set.

11. (Currently Amended) The portable telephone set according to claim 10, wherein the
transfer of data to the different portable telephone set is made by infrared communication,
bluetooth or like wireless communication or wired communication via connector.

12. (Previously presented) The portable telephone set according to claim 1, wherein the
data of each item is data of a telephone set or a scheduler.

13. (Previously presented) The portable telephone set according to claim 3, wherein the
control part displays reserved data on the display part, and has a control function of
transferring the displayed data on a different portable telephone set and a control function
of receiving the data transferred from a different portable telephone set.

14. (Previously presented) The portable telephone set according to claim 6, wherein the

control part displays reserved data on the display part, and has a control function of transferring the displayed data on a different portable telephone set and a control function of receiving the data transferred from a different portable telephone set.

15. (Previously presented) The portable telephone set according to claim 8, wherein the control part displays reserved data on the display part, and has a control function of transferring the displayed data on a different portable telephone set and a control function of receiving the data transferred from a different portable telephone set.

16. (Previously presented) The portable telephone set according to claim 3, wherein the data of each item is data of a telephone set or a scheduler.

17. (Previously presented) The portable telephone set according to claim 6, wherein the data of each item is data of a telephone set or a scheduler.

18. (Previously presented) The portable telephone set according to claim 8, wherein the data of each item is data of a telephone set or a scheduler.

19. (Currently Amended) The portable telephone set according to ~~one of~~ claim 3, wherein ~~an~~ image transferred from a different portable telephone set is ~~inputted to~~ received by the image input part.

20. (Previously presented) The portable telephone set according to claim 3, wherein the data form of the image is JPEG.
